Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The drawings filed on 7/2/03 are informal, since the letters and numbers are not uniform in nature throughout the Figures.

Claim Objections

Claim 1 is objected to because of the following informalities: In lines 2 and 3, "during refueling of a tank from a dispensing nozzle" is redundant and should be deleted. Appropriate correction is required.

Claim 4 is objected to because of the following informalities: In line 3, the semicolon should be a period. Appropriate correction is required.

Claim 7 is objected to because of the following informalities: In lines 1 and 2, "wherein said flow control valve" is redundant and should be deleted. Appropriate correction is required.

Claim 8 is objected to because of the following informalities: In line 4, "bout" should be - - about - -. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 8 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Saitoh.

In regard to claim 1, the Saitoh reference discloses a "fuel vapor recirculation system" (see Fig. 1) comprising a "filler tube" 6 with "sealing means" 6a, a "vapor recirculation path means" 11, a "vapor storage device" 10 and a "flow control valve" 8b

In regard to claim 4, "float operated valve" 7 is in fluidic series with valve 8b.

In regard to claims 8 and 14, the method as claimed would be inherent during normal use and operation of the device.

Allowable Subject Matter

Claims 2, 3, 5-7 and 9-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Kunimitsu et al. and Nakajima et al. references pertain to various fuel vapor recirculation systems.
